

BORAMBIL

MERINOS

30TH ANNUAL ON PROPERTY RAM SALE

TUESDAY 15TH SEPTEMBER 2026
SALE COMMENCING 1PM
'COLLENDINA'
1955 SPRING DRIVE, COROWA 2646

**122 MERINO AND POLL MERINO
RAMS ON OFFER**

MAY - JUNE 2025 DROP

BORAMBIL MERINOS

BORAMBIL MERINO STUD FLOCK NO. 4354
BORAMBIL POLL STUD FLOCK NO. 1586

*"Borambil Merino and Poll Merino Stud
produces big bodied, heavy cutting sheep
with soft and nourished fine to medium wool.
Our sheep are bred to thrive in
all environments"*

 **sheep** GENETICS

About Borambil Merinos

Welcome to the 30th Annual Borambil Merinos On-Property Sale.

Borambil Merino Stud was established by the Mathews Family in 1968 and was purchased in 2006 by Rodger and Kim Mathews.

Traditionally based on Roseville Park and Nerstane bloodlines, the infusion of genetics from Wanganella and Yarrawonga has assisted Borambil Merino Stud in increasing sheep size and wool cut without compromising wool quality.

The Borambil Poll Merino Stud was established in 2014 based on Moorundie and Poll Boonoke bloodlines. This strong genetic foundation has since been complemented by the introduction of specially selected genetics from studs such as Roseville Park and Yarrawonga.

Borambil maintains a focus on wool quality, wool cut and well-nourished skin types on sheep that are easy care with quick maturity, high fertility and strong conformation. Borambil's stud ewes are typically 70-80kg mature body weight, cutting 7.5-8.0kg of 18.5-micron white, waterproof wool. In recent years we have successfully lowered the fibre diameter and improved fibre quality, particularly in the poll merinos, without compromising wool cut or body types.

Borambil Merinos will focus on continuing to improve the growth, muscle and fat traits of our sheep; continue to select for fertility, do-ability, and structural correctness; and preparing for potential future animal welfare requirements. All whilst ensuring that we maintain the superior quality and productive wools for which Borambil Merinos is renowned.

We wish you success at our 2026 sale and we look forward to working with you in the future.

The Borambil Merinos' Team

Summary of Data Presented

All sale rams are genomic tested and submitted to Sheep Genetics. Fleece weight recording was conducted by Riverina Wool Testers, wool samples were analysed by AWTA in July and body scans were conducted by R. Power on 5th August.

Tag	Visual individual ID, corresponds with Sheep Genetics ID.
Sire	Sire of animal
Dam	Dam of animal
Poll	Genomic poll / horn test result (PP,PH or HH)
BT	Birth type (single or twin)
FD	Fibre diameter (micron)
SD	Standard deviation of fibre diameter
CV	Coefficient of variation of fibre diameter
CF	Comfort factor – the percentage of fibres finer than 30 microns.
GFW	Greasy fleece weight, expressed as a % of the mob average
BWT	Body weight (kg), taken 5 th August
EMD	Eye muscle depth (mm), taken 5 th August
FAT	Fat cover (mm), taken 5 th August
YFD	Yearling Fibre Diameter ASBV
YCFW	Yearling Clean Fleece Weight ASBV
YWT	Yearling Weight ASBV
YEMD	Yearling Eye Muscle Depth ASBV
YFAT	Yearling Fat ASBV
FW	Fine Wool Production Index
WP	Wool Production Index
SM	Sustainable Merino Production Index

The average test and ASBV results for the Borambil 2026 sale team are:

FD	SD	CV	CF	GFW	BWT	EMD	FAT
18.8	2.8	14.5	99.7	103%	92.8	37.8	5.1
YFD	YCFW	YWT	YEMD	YFAT	FW	WP	SM
-1.6	25.7	7.0	-1.1	-1.0	182	183	145

Australian Sheep Breeding Values (ASBVs)

MERINOSELECT is Australia's genetic evaluation system for Merino producers. ASBVs are generated from data, pedigree and genomic information collected.

ASBVs are a prediction of an animal's genetic merit for a particular trait. They are an indication of how an animal's progeny will perform based on the genes they will pass on. ASBVs may be different to the animal's actual performance, which is the result of both genetic and environmental influences.

We recommend that ASBVs should be used in conjunction with visual selection methods and assessed alongside “raw data” (i.e. FD, SD etc).

MERINOSELECT has developed several Indexes for use by producers. Indexes combine traits into one number and are a way to rank animals quickly and easily. Indexes are created by putting a weighting on each trait depending on how important they are.

The **Fine Wool index (FW)** is based on a production system where most income is from wool clip, with a focus on reducing the micron of the clip.

The **Wool Production index (WP)** is based on a production system where the majority of income is from wool clip, with a strong focus on increasing wool production without compromising wool quality.

The **Sustainable Merino index (SM)** is based on a production system where the income from sheepmeat production and the wool clip is reasonably balanced. Traits such as clean fleece weight, growth, lean meat yield and reproduction are more evenly balanced.

Further information is available at <https://www.sheepgenetics.org.au/>

Borambil Merinos ASBV data has been extracted from the MERINOSELECT analysis dated 7 August 2026.
